PREVENT. PROTECT. SAVE LIVES.

NIITEK's high performance VISOR™2500 Ground Penetrating Radar (GPR) has transitioned from the U.S. Army to form the heart of our MINESTALKER II system providing Humanitarian Demining services in ex-conflict zones across the globe. Dozens of countries are plagued by the continuing threat of millions of buried landmines and other explosive hazards. The MINESTALKER series of remotely controlled mine detection and marking systems prevents the loss of life and limb, making our world a safer place. MINESTALKER II combines advanced real-time ATR algorithms, optional integrated metal detection, remote controls, and user-friendly software, in a ruggedized, supportable, affordable package.

FEATURES

- + Breakthrough Pd/FAR* performance
- + Automatic real-time detection & marking
- + Integrated on Land Tamer vehicle
- + Remote start, E-stop, cruise control
- + Intuitive controls touchscreen display
- + Remote subsurface 3D visualization
- + Electronic marking with differential GPS
- + Readily adaptable to other vehicles

BENEFITS

- + High confidence countermine operations
- + More efficient demining operations
- + High performance in versatile vehicle
- + Maximized protection of operators
- + Rapid proficiency/ease of use
- + Visual alerts for a variety of threats
- + Accurate location of buried hazards
- + Scalable for other applications

* Pd= Probability of Detection; FAR= False Alarm Rate
